opsz 14

Johannes Gutenberg's work on the printing press began in approximately 1436 when he partnered with Andreas Heilmann, owner of a paper mill. Having previously worked as a goldsmith, Gutenberg made skillful use of the knowledge of metals he had learned as a craftsman. He was the first to make type from an alloy of lead, tin, and antimony, which was critical for producing durable type that produced high-quality printed books and proved to be much better suited for printing than all other known materials.

ROBOTO MOUNTAIN HAD SNOW ON TOP BUT THE BOTTOM WAS WARMER IN LATER SUMMER WHEN THE SUN IS OVER FRANKLIN PEAK

Johannes Gutenberg's work on the printing press began in approximately 1436 when he partnered with Andreas Heilmann, owner of a paper mill. Having previously worked as a goldsmith, Gutenberg made skillful use of the knowledge of metals he had learned as a craftsman. He was the first to make type from an alloy of lead, tin, and antimony, which was critical for producing durable type that produced high-quality printed books and proved to be much better suited for printing than all other known materials. Intro text leads reader into the article by the nose, with grace and dignity and a little pithy charm. Typeface has changed to the appropriate optical size by the miracle of modern typography.
